Where remarkable products begin

Successful businesses make smarter data-driven decisions

Data analysis has become the cornerstone of decision-making, driving businesses towards higher levels of innovation and financial success.

Improve performance

Increase efficiency

Empower your teams

A complete business intelligence platform

Optimize processes by integrating data analysis and informed decision making into each step.

Provide fast, intuitive, and direct access to data for cross-functional departments.

Reliable, ready to use, and easy to understand.

Preconfigured dashboards using data collected from both Trace One PLM and external solutions.

30 years of experience in the CPG and retail space

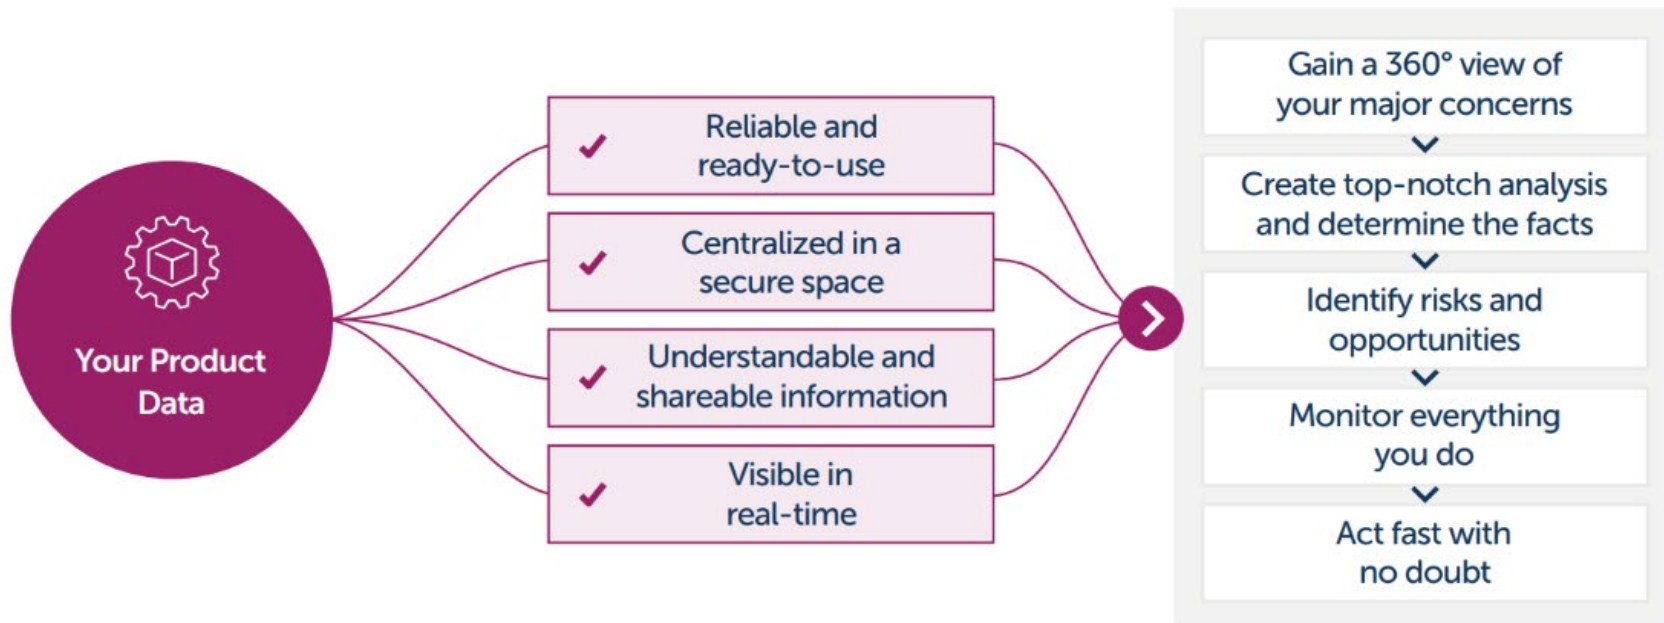

Recognition of industry challenges

Centralized analysis assets

Expertise in PLM data

Predictive data policies

Key features of PLM analytics for manufacturers

Evolve from descriptive reporting to prescriptive analytics

Descriptive

What happened?

Review current state data to analyze the performance of your business.

Diagnostic

Why did it happen?

Drill down in to detailed data to identify the source of the issue.

Predictive

What will happen?

Forecast trends and predict risks based on consistent data to create the best strategy.

Prescriptive

How can we make it happen?

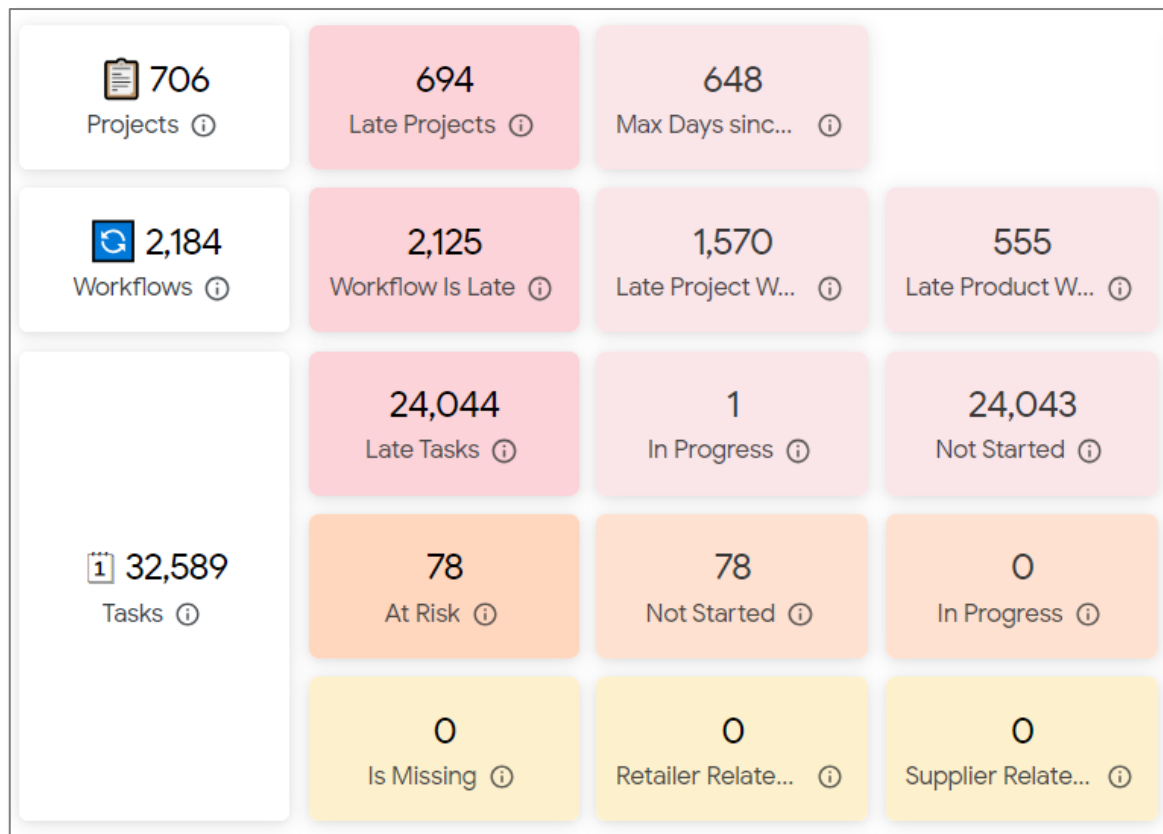

Identify the actions you need to take to make your strategy a reality.

Develop collection | project dashboard

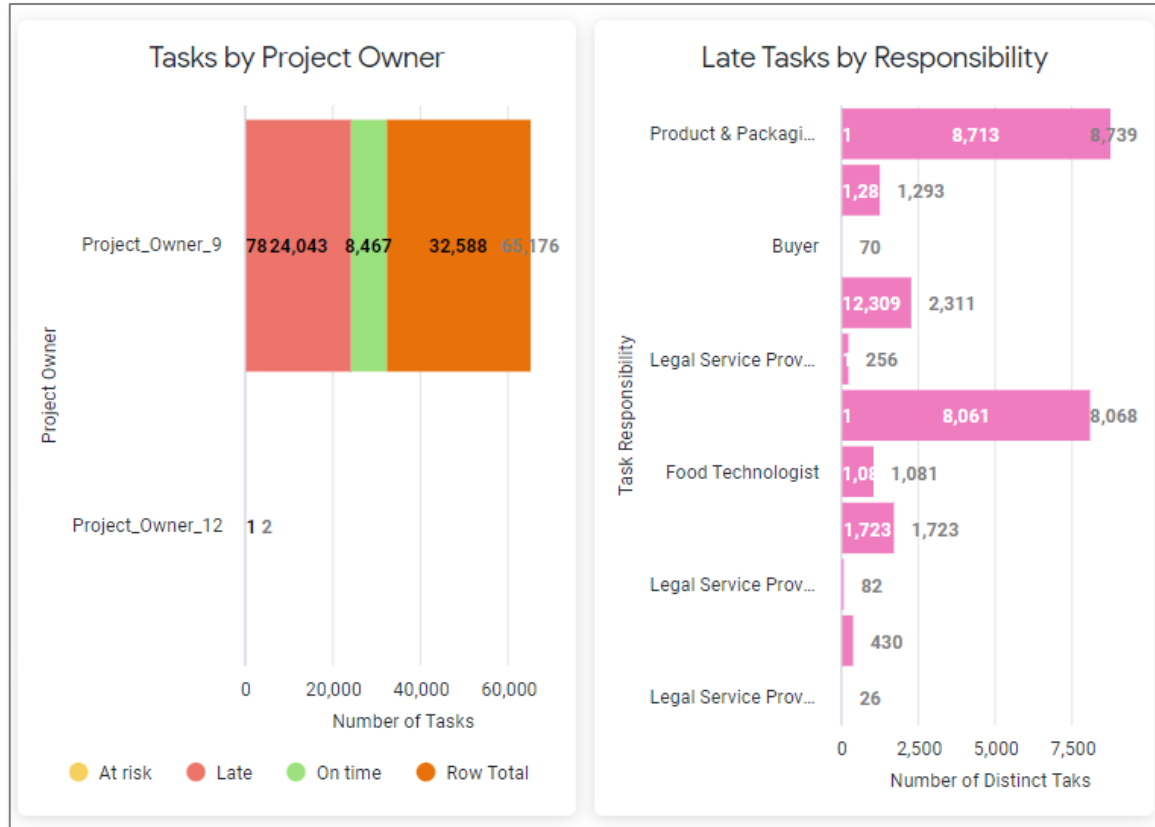

Use case: As an executive I want to know why product development projects failed to meet the agreed deadline

Use case: Project KPI's

Use case: Task analysis

Develop collection | capacity planner

Use case: As a project manager I want to analyse resource bottlenecks and adjust teams or workflows for future success

Use case: manufacturing items & tasks

Use case: manufacturing items & tasks by team responsibility

Benefits of PLM analytics

Act

DATA GOVERNANCE

Make data -driven decisions with centralized and synchronized data in PLM system and powerful data analytics, reporting, flexible dashboards and real -time performance metrics.

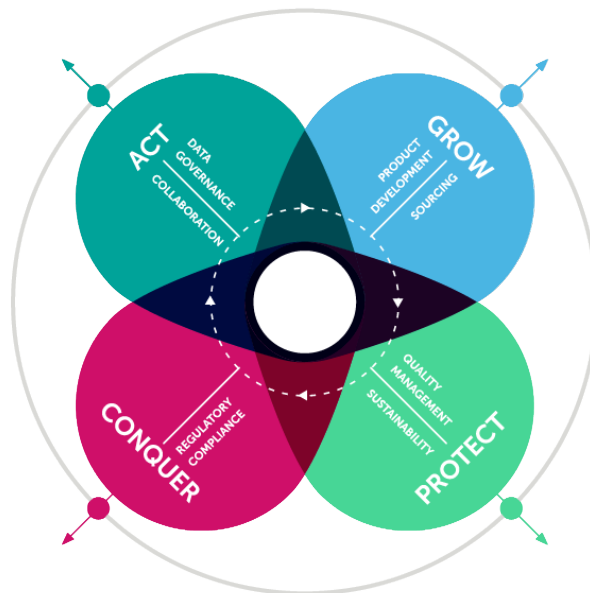

COLLABORATION

Manage and measure every aspect of the product lifecycle with streamlined collaboration across departments and the whole supply chain.

Conquer

REGULATORY COMPLIANCE

Expand to new markets using a global regulatory database for fast go/no -go assessments and reduce recall risk with integrated compliance checks at every stage of product development.

Grow

PRODUCT DEVELOPMENT

Accelerate time -to- market and increase operational productivity with a holistic 360 view of all aspects of the product development process.

SOURCING

Find new products and suppliers easily and improve the efficiency of your tendering process to launch products faster at the right price and quality.

Protect

SUSTAINABILITY

Connect your corporate social responsibility goals with day -to- day operations embedding sustainability into your product strategy.

QUALITY

Drive continuous improvement of your products and build a resilient supply chain to quickly respond to market trends and disruptions.
